

Microsoft Azure – List of resources

The screenshot shows the Microsoft Azure portal interface. At the top, the header reads "Microsoft Azure All resources". Below this, a sidebar on the left contains navigation icons. The main content area is titled "All resources" and shows a list of 15 items. The list is filtered by name and displays columns for NAME, TYPE, RESOURCE GROUP, and LOCATION. The resources listed are:

NAME	TYPE	RESOURCE GROUP	LOCATION
EastFree	App Service plan	FBLA	East US
fbla	SQL server	FBLA	East US
FBLA-YardSale	SQL database	FBLA	East US
FBLA-YardSale	App Service	FBLA	East US
FBLA-YardSaleDownload	App Service	FBLA	East US

Microsoft Azure – Authentication / Authorization

The screenshot shows the Microsoft Azure portal interface for the "FBLA-YardSale - Authentication / Authorization" settings. The left sidebar contains a list of settings, with "Authentication / Authorization" selected. The main content area displays the "Authentication / Authorization" settings for the App Service. The "App Service Authentication" section shows the "On" toggle is selected. The "Action to take when request is not authenticated" is set to "Log in with Google". The "Authentication Providers" section lists several providers, with "Google" highlighted as "Configured".

Authentication / Authorization

Authentication / Authorization is a turn key solution that lets you control access to your app

App Service Authentication

Off On

Action to take when request is not authenticated

Log in with Google

Authentication Providers

- Azure Active Directory: Not Configured
- Facebook: Not Configured
- Google: Configured
- Twitter: Not Configured
- Microsoft Account: Not Configured
